(54) Title: VACCINE COMPRISING AN ANGIOMOTIN OR A POLYNUCLEOTIDE ENCODING AN ANGIOMOTIN AND
ITS USES FOR THE TREATMENT OF ANGIOGENIC-RELATED DISORDERS

A

B

(57) Abstract: A vaccine for preventing formation of blood vessels, for example neoangiogenesis, as well as repressing existing vascularization associated with tumors and other diseases, comprising angiotin, for example as a whole molecule or fragment thereof or encoded as a gene or mRNA, or administered as dendritic cells (DC cells) expressing angiotin, which may be utilized to generate immune responses to the angiotin molecule. Inhibition of angiogenesis and delay in tumor outgrowth in animal models of cancer is achieved.
